

# LXOUND

Tested many times against its main competitors, the PRO 5000 headsets are out as the top performer in terms of acoustics, reliability and lifetime.

## PRO 5000

### PRO 5000

*Headset for call centers*

Regarded as the most robust headset on the market, the Lexound PRO 5000 combines excellent acoustic performance with a durable lifecycle, all for an exceptionally low price.

The PRO 5000 is equipped with a powerful microphone. The over-sized capsule enabled to fix a very sophisticated noise-cancelling microphone that cancel background noise and give the conversation an extreme sonic clarity.

The size of the ear pads allows a better acoustic isolation for an improved listening on the phone platforms. Hypoallergenic memory foam ear cushions, covered by protein leather, maximize the user's comfort.

Having fulfilled by far HALT standards (Highly Accelerated Life Test), the LX PRO 5000 wins the challenge of the longest lifespan in call centers.

Inspiring people, inspiring change
